

OUR MISSION

At Snugglezzz, everything revolves around providing the best sleep comfort. Our mission is simple yet powerful: we aim to promote healthy and relaxed sleep while wrapping our customers in beautiful, vibrant prints that brighten up their daily lives.

SUSTAINABILITY

We take pride in our Dutch craftsmanship and dedication to sustainability. All our products are manufactured in the Netherlands, allowing us not only to minimize our environmental impact but also to quickly adapt and develop to meet our customers' needs. We use only fair trade materials, and our products meet the Oeko-Tex certification.

QUALITY

At Snugglezzz.nl, quality and comfort come first. Our clothing is made from the highest quality materials. We choose durable zippers and accessories so that our clothing lasts long.

Oeko-Tex is a certification that ensures safety for your health. It tests clothing for harmful substances. If a garment receives the Oeko-Tex certification, it is free from harmful substances. Better for your skin and health!

The Thermal Overall Grade value, abbreviated as TOG, is a measure of the insulation value of textiles.

The higher the TOG value, the higher the warmth and insulation value of the material. The TOG values range from 0 to 4.

CHILDREN'S SLEEP SACKS

Our children's sleep sacks are designed in collaboration with parents, caregivers, and occupational therapists to provide comfort and safety to children with specific needs. They are made of soft, stretchy fabrics that provide comfort and freedom of movement, while the breathable properties ensure that body temperature remains balanced during sleep. Oeko-Tex certified, free from harmful substances.

Our children's sleep sacks can be worn with the zipper on the chest or back, making unwanted opening difficult. The zipper closes from top to bottom.

COTTON JERSEY FOR SUMMER

For the hottest summer nights, we have our summer variant of the children's sleep sacks, made of stretchy breathable Cotton Jersey fabric, with a TOG value of 1.0. This variant is ideal for warm summer nights and provides a lightweight, comfortable sleeping experience.

JOGGING FOR ALL SEASONS

For the rest of the year, we have our Jogging variant of the children's sleep sacks, made of stretchy breathable Jogging fabric with a TOG value of 2.5, ideal for cooler nights. The Jogging is double-sided, with 100% breathable cotton on the outside and warm soft alphenfleece on the inside.

The Jogging variant also has a hook-and-loop system at the bottom of the zipper to prevent unwanted opening.

SLEEP SACKS FOR ADULTS

Our sleep sacks provide extra care and comfort for adults who move a lot during their sleep, so that loose blankets are no longer a problem.

We offer sleep sacks with short and long sleeves, in Jogging fabric for all seasons and Tricot for warm summer nights. Our Jogging fabric is double-sided, with a 100% cotton outer layer and a soft alphenfleece inner layer, breathable and ensures a comfortable temperature with a TOG value of up to 2.5, while our Tricot fabric has a TOG value of 1.0.

Our sleep sacks are available in many beautiful prints and have a high-quality YKK zipper that closes from top to bottom.

FOOTED PYJAMAS

Our footed pyjamas are available in two variants in different prints.

Jogging pyjamas are wonderfully warm with a 100% cotton outer layer and a soft alphenfleece inner layer, breathable and ensures a comfortable temperature with a TOG value of 2.5. This model has a zipper that opens to the ankle for easy dressing.

Ribbed fabric pyjamas are cooler with a TOG value of 2.0 and are made with anti-slip soles for extra grip. Ribbed fabric has 4-way stretch for optimal freedom of movement.

ONESIES

Our adult onesies are the perfect choice for those looking for comfort and style. With a wide collection of beautiful prints available in sizes Small to 3XL, there are plenty of options for everyone.

The 4 metal snap buttons ensure that the diaper stays in place without shifting.

The ideal fit of our onesies ensures that the diaper does not shift and is completely covered.

The onesies are made of 95% cotton and 5% elastane, making them wonderfully stretchy and soft while providing a snug, discreet fit.

The onesies are made of durable materials and high-quality fabric and have the OEKO-TEX certification, ensuring that they do not contain any harmful substances. The TOG value of 1.0 indicates that the onesies have a low insulation value, ideal for use in a warmer environment.
